

GOANNA GOLF

IT'S
GO
TIME!

PLAY, PUTT AND LEARN BOOKLET

WELCOME TO GOANNA GOLF

Are you ready for some mini-golf fun with our friend Anna the Goanna? Yes?! Grab your putter, your favourite colour ball and your teammates and let's give it a go!

BEFORE YOU START YOUR GAME

Anna has a bunch of friends here, each with their own traps and tricks to challenge even the best mini golfers. If you're not careful to keep your ball on the green, you might just lose it to one of the cheeky critters out there!

WHAT TO WATCH OUT FOR

On hole 4, make sure you watch out for the slippery tiger snake spanning across the full width of the putting green! Also, what's under the log? I'd rather putt there than into one of the snakes mouths.

Good work making it to hole 13 you're now in ant territory! Don't be fooled by the bull ants though. They might be small, but they can stop your ball with barely any effort at all!

Do you like to laugh? Hold your giggle in and try to keep your focus as the laughing Kookaburra attempts to throw you off your game on hole 15.

SPECIAL TIP

This might all sound a little tricky, but don't worry - there's a few secret shortcuts to winning each hole (especially on hole 2, shhh don't spill the secret).

>> Scan the QR code to watch all the tips and tricks!

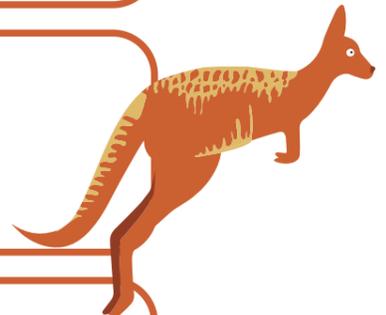

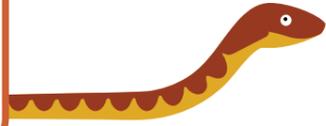

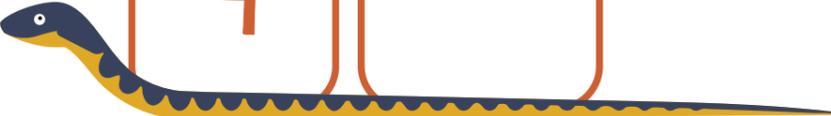

THE MAP

Check the middle of your booklet for full Goanna Golf course map.

HOLES 1-6

	PAR	SCORE	
1ST HOLE 	3	<input type="text"/>	WOMBATS HAVE CUBED OR SQUARE SHAPED DROPPINGS!

-  SELFIE ZONE!

GIVE IT A GO!

HOLES 7-12

7TH HOLE  **PAR 3**

Red River Gum Trees don't need to be on a river to survive. In fact, they can live in the desert of central Australia by using water that is hidden underground!

8TH HOLE

TREE GOANNA'S USE THEIR TONGUE TO SMELL.

9TH HOLE

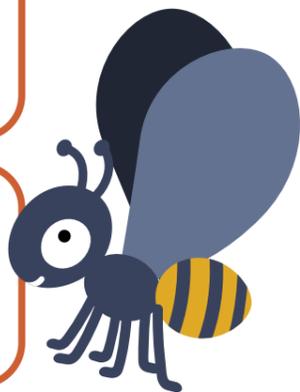

HALFWAY TOTAL SCORE

10TH HOLE

Leafcutter Bees get their name because they cut little ovals out from leaves and use them to weave tiny cradles for their nests.

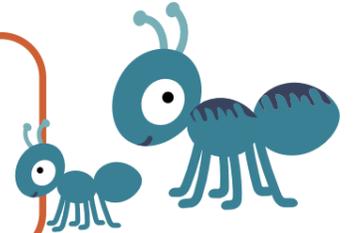

11TH HOLE

12TH HOLE

HOLES 13-18

13TH HOLE **PAR 3**

Short-Beaked Echidnas are very good swimmers and paddle in water with only their snout and a few spines visible!

14TH HOLE

15TH HOLE

A FEMALE REDBACK IS MORE VENOMOUS THAN A MALE REDBACK SPIDER

16TH HOLE

17TH HOLE

18TH HOLE
